Power Filtering & Switching

A 24-hour security team monitors building security with CCTV, access notification systems and on random physical rounds. For security and safety reasons, access to the server room is granted by escort only. We are happy to be available to you anytime day or night should you need physical access to your equipment, or remote hands to assist you.

With multiple levels of building and physical security, 100% Internet availability and non-interruptible power supply, you can rest assured that your equipment is safe and highly available.
